

Vikas Basa

Graduate Student | Milwaukee, Wisconsin | (414) 381-6304 | vikasbasa729@gmail.com | [linkedin](#)

SUMMARY

Data-focused Computer Science graduate student with experience in data analysis, reporting, and process optimization at Accenture. Skilled in Python, SQL, and data visualization fundamentals, with hands-on experience through a Data Science internship. Proven ability to transform complex data into actionable insights. Seeking Data Analyst or Automation-focused roles.

EXPERIENCE

Data Science Intern

Sports Media | Remote, US | Aug 2025 – Sep 2025

- Cleaned and analyzed datasets using Python and Excel
- Identified trends and patterns in sports-related data
- Developed basic dashboards and reports for data visualization
- Assisted in automating repetitive data tasks to improve efficiency

Custom Software Engineering Associate

Accenture | Full Time, India | Oct 2022 – Jul 2024

- Analyzed and processed large datasets to generate business reports
- Improved reporting accuracy to 97% through validation and quality checks
- Collaborated with cross-functional teams to align technical outputs with business needs
- Transformed complex data into actionable insights for decision-making

Aerospace Engineer

Accenture | Part Time, India | Apr 2023 – Jan 2024

- Worked on aerospace-related workflows aligned with Airbus processes Supported structured data handling and process documentation
- Ensured accuracy and compliance in data-driven operational tasks Collaborated with teams to maintain efficiency in specialized workflows

SKILLS

Programming : Python, SQL, HTML, CSS, VBScript

Data Tools : Microsoft Excel, Pandas, NumPy

Visualization : Tableau, Power BI (Basic)

Technologies : Data Analysis, Workflow Automation, Machine Learning (Basics), Software Development Life Cycle (SDLC)

Tools : Git, GitHub, Airbus Workflow, Visual Studio Code, Azure

EDUCATION

Master of Science in Computer Science, Software Engineering

Concordia University Wisconsin, Mequon | 2024 - 2026

- GPA: 3.4/4.0
- Relevant Coursework: Database Systems, AI, Data Science

PROJECTS

Real-Time Accident Detection System

- Built a machine learning model analyzing 500+ real-time data points Achieved 83% accuracy and improved response time by 20% Optimized processing efficiency by 40%

Automated Water Pump Control System

- Developed an automated system using sensors and control logic Reduced manual intervention and improved operational efficiency Performed real-time testing and debugging

CERTIFICATIONS

Microsoft Azure Fundamentals (AZ-900)

Microsoft Security Fundamentals (SC-900)

SQL and Relational Databases 101

Accenture Technology Quotient

LEADERSHIP

Event Coordinator – University Programs
